Surgical Site Solutions, Inc.

Mission: To develop and market unique product solutions that make pre-surgical infection control processes more efficient and effective.

Clipvac IS the BETTER Method

- **ClipVac™** is a small, portable, battery operated vacuum with a single-use vacuum tip and filtered reservoir, specifically designed to fit current popular surgical clippers.
- ClipVac does not introduce contaminants into the incision area. It effectively removes clippings quickly and effectively.
- Skin contact is minimal, so there is no potential for allergic reaction.
- **NO Tape Required!**
- It removes clippings quickly and effectively.
- Easy to use.

ClipVac reduces the time required for preoperative preparation. It makes infection control procedures more efficient.

Formation of Surgical Site Solutions

Dan Landrie

An experienced RN who looked for a better way to remove hair during.

Teamed up with two other partners to:

- Form an S-corp.
- Apply for a patent
- Develop proof of concept

Formation of Surgical Site Solutions (Cont.)

Need for experienced management team to further bring product to Market.

Jim Kregel former V.P./GM of Thomas Products new President

Larry Panzer, former Director of New Product Development also brought on as V.P. of Technology
